IAQG 9110 - Quality Management Systems - Requirements for Aviation Maintenance Organizations

• This document standardizes quality management system requirements to the greatest extent possible and can be used at all levels of the supply chain by organizations around the world. Its use should result in improved quality, schedule, and cost performance by the reduction or elimination of organization-unique requirements and wider application of good practice. While primarily developed for the aviation and defense industry organizations providing maintenance services, this standard can also be used in other industry sectors where a quality management system with additional requirements over an ISO 9001 system is needed. 9110:2016 Quality Management Systems - Requirements for Aviation Maintenance Organizations
